

## Gas/Water Block Connector

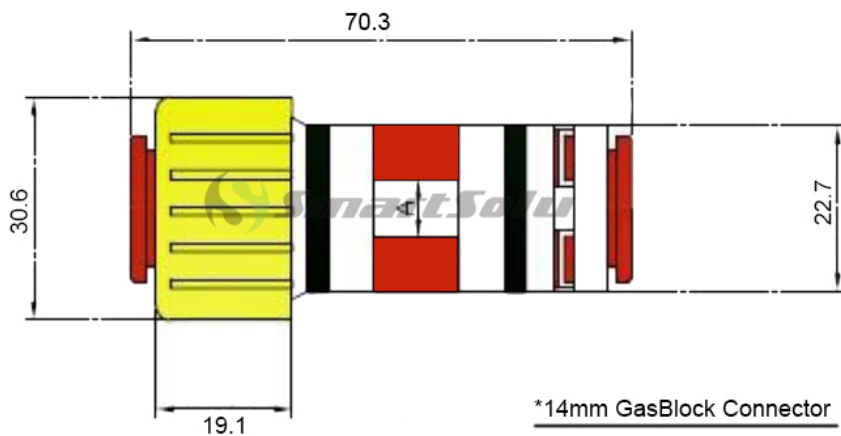

**Microduct Gas Block Connectors** with transparent body for visual control when blowing microcable. Connectors can be reused for more than 10 times while still maintaining the same high performance characteristics - operational at 15bar (218 psi) and with quick burst rating of 25bar (363 psi). All connectors have two removable locking clips to prevent tube release.

### Features:

Gas/Water Block Connectors normally used between indoor and outdoor environments to prevent air flow that may result in condensed water getting into in ducts. After cable installation, the connector can be gas sealed by pushing the connector ends together.

- Easy installation, without any special tools.
- Transparent plastic body, easy to observe the situation.
- High temperature resistance -40°C~65°C
- Avoid fluid(gas) entering the microducts and damage the equipments.
